PROFESSIONAL SUMMARY

Aspiring Full Stack Development Intern with a strong foundation in Backend and Frontend technologies, including React.js, JavaScript, Node.js, and MongoDB. Experienced in developing and maintaining we...

TECHNICAL SKILLS

Node.js

React.js

MySQL

MongoDB

Java

OOP Principles (Inheritance, Encapsulation, Polymorphism, Abstraction)

Core Libraries (Collections, Exceptions, Generics)

Design Patterns

Spring Boot

Spring MVC

Spring Security

REST APIs

API Testing

Hibernate

JPA

Maven

Express.js

JavaScript (ES6+)

Vue.js (basics)

Next.js

TypeScript

HTML5

CSS3

Tailwind CSS

Bootstrap

Redux

PostgreSQL

Redis

SQL Queries

Indexing

Query Optimization

JPA/Hibernate ORM

ACID Transactions

LLMs

RAG Pipelines

LangChain

FAISS

TensorFlow

Scikit-learn

SHAP

OpenAI API

Pandas

Git

GitHub

Docker

CI/CD

Maven

Swagger/OpenAPI

Postman

AWS (EC2, Amplify)

Firebase

Code Reviews

WORK EXPERIENCE

JPMorgan Chase & Co.

October 2025

Software Engineering Virtual Experience

- Wrote clean, maintainable Java backend code, applying OOP concepts to implement and debug features in production-style financial software.
- Built and tested REST APIs and distributed integrations, actively participating in code reviews and team discussions, and applying version control (Git).
- Implemented Kafka-based event-driven integration, documenting system components and contributing to team discussions.

AICTE EduSkills & AWS Academy

April – June 2025

AI-ML Virtual Internship

- Gained hands-on AI/ML knowledge, building and testing ML models on real-world datasets using Python, Pandas, and Scikit-learn.
- Applied AI techniques to solve business problems, demonstrating strong problem-solving skills and contributing to team goals in a fast-paced environment.
- Wrote clean, well-documented Python code, practicing attention to detail and structured learning.

PROJECTS

Gramflix | Referral & Wallet System

Java, Spring Boot, Spring Security, React.js, JavaScript, MongoDB, Redis, Docker, JWT, JPA, Hibernate, AWS EC2, Amplify

- Led full-stack development, designing database schema and building the Java Spring Boot backend, applying OOP principles and debugging iteratively to handle all edge cases for a web application.
- Expertly debugged JPA/Hibernate ORM issues and optimized MongoDB queries, ensuring reliable performance for 50,000+ transactions in the web application.

Freelance – MLM Microservices
Platform Node.js, Express.js, JavaScript, MongoDB, Redis, Docker, JWT, API
Gateway, Microservices

- Designed and implemented a microservices architecture using Node.js/Express.js, wiring services via an API Gateway and debugging inter-service failures for a robust backend.
- Modeled complex business logic in JavaScript for commission calculation, resulting in a system handling 10,000+ API requests/day without issues.

EDUCATION

JIS College of Engineering <i>B.Tech ECE</i>	2023 – 2027
S.S College Jehanabad <i>Intermediate</i>	2022
Kainat International School <i>Matriculation</i>	2020

CERTIFICATIONS

NPTEL IIT Kharagpur – Java | Elite Certification, NPTEL IIT Madras – Database Systems, 3× Adobe Hackathon Participant
